

stoneworks

Forte matericità e alta resistenza della struttura delle superfici: queste le principali caratteristiche che contraddistinguono Stoneworks, la nuova collezione di IMPRONTA CERAMICHE che si ispira alla naturalezza delle pietre naturali. Le superfici di questa nuova serie sono animate da leggeri movimenti in massa che esaltano progetti in cui gli spazi godono di un forte impatto visivo e dove il vigore espressivo della pietra è stemperato dalle sofisticate tonalità del beige e del tabacco.

Una produzione che ripropone un approccio minimal e moderno del grès porcellanato, disponibile in tre formati (60x60, 30x60, 30x30cm) che, a seconda dell'uso, rendono la collezione adatta a forme architettoniche semplici o articolate, ideale per grandi superfici commerciali.

Stoneworks è presentata in ben tre finiture rettificate (levigata, naturale e bocciardata), vivacizzate da polveri dall'effetto brillante che esaltano la luminosità della pietra. Una graduale scala di colori permette, inoltre, di personalizzare gli spazi con tonalità che dal bianco pallido raggiungono il caldo tabacco e l'elegante nero, passando attraverso il beige e il grigio, proposti sia nella gradazione più chiara del sabbia e dell'argento, che in quella più scura del caffè e della lavagna. La collezione è, inoltre, completata da un contemporaneo decoro muretto, nel formato 30x60 cm e da un geometrico decoro mosaico 30x30cm a tessere 5x5 cm, proposto in tutti i colori della serie e in tutte le superfici.

L'innovazione tecnologica e la continua ricerca di soluzioni alternative che soddisfano le domande dell'architettura e dell'edilizia contemporanea, rendono IMPRONTA CERAMICHE un'azienda sempre più attenta alle evoluzioni del mercato.

A strong texture and extremely tough surface structures: these are the key features of Stoneworks, the new IMPRONTA CERAMICHE collection inspired by the spontaneous character of natural stones.

The surfaces of this new collection are given variety by the slightly changeable patterns within the tile bodies, seen at full value in design schemes with high visual impact, and where the expressive strength of stone is attenuated by the sophisticated beige and tobacco shades.

A range that offers a minimalist, modern approach to porcelain tile design, with three sizes (60x60, 30x60, 30x30cm) that can be used in different ways to suit simple or complex architectural forms, ideal for large retail developments.

Stoneworks comes in no less than three edge-ground finishes (polished, natural and bush-hammered), given extra brightness by sparkling powders that emphasise the stone's intrinsic shine. What's more, the gradual scale of colours mean design schemes can be personalised with shades ranging from pale white to warm tobacco and elegant black, passing through beige and grey, featured in both the pale sand and silver and the darker coffee and slate tones. The collection is also completed by a fashionable masonry-pattern decorative tile in size 30x60 cm and a geometric mosaic 30x30cm decorative piece with 5x5 cm dots, available in all the range's colours and surface finishes.

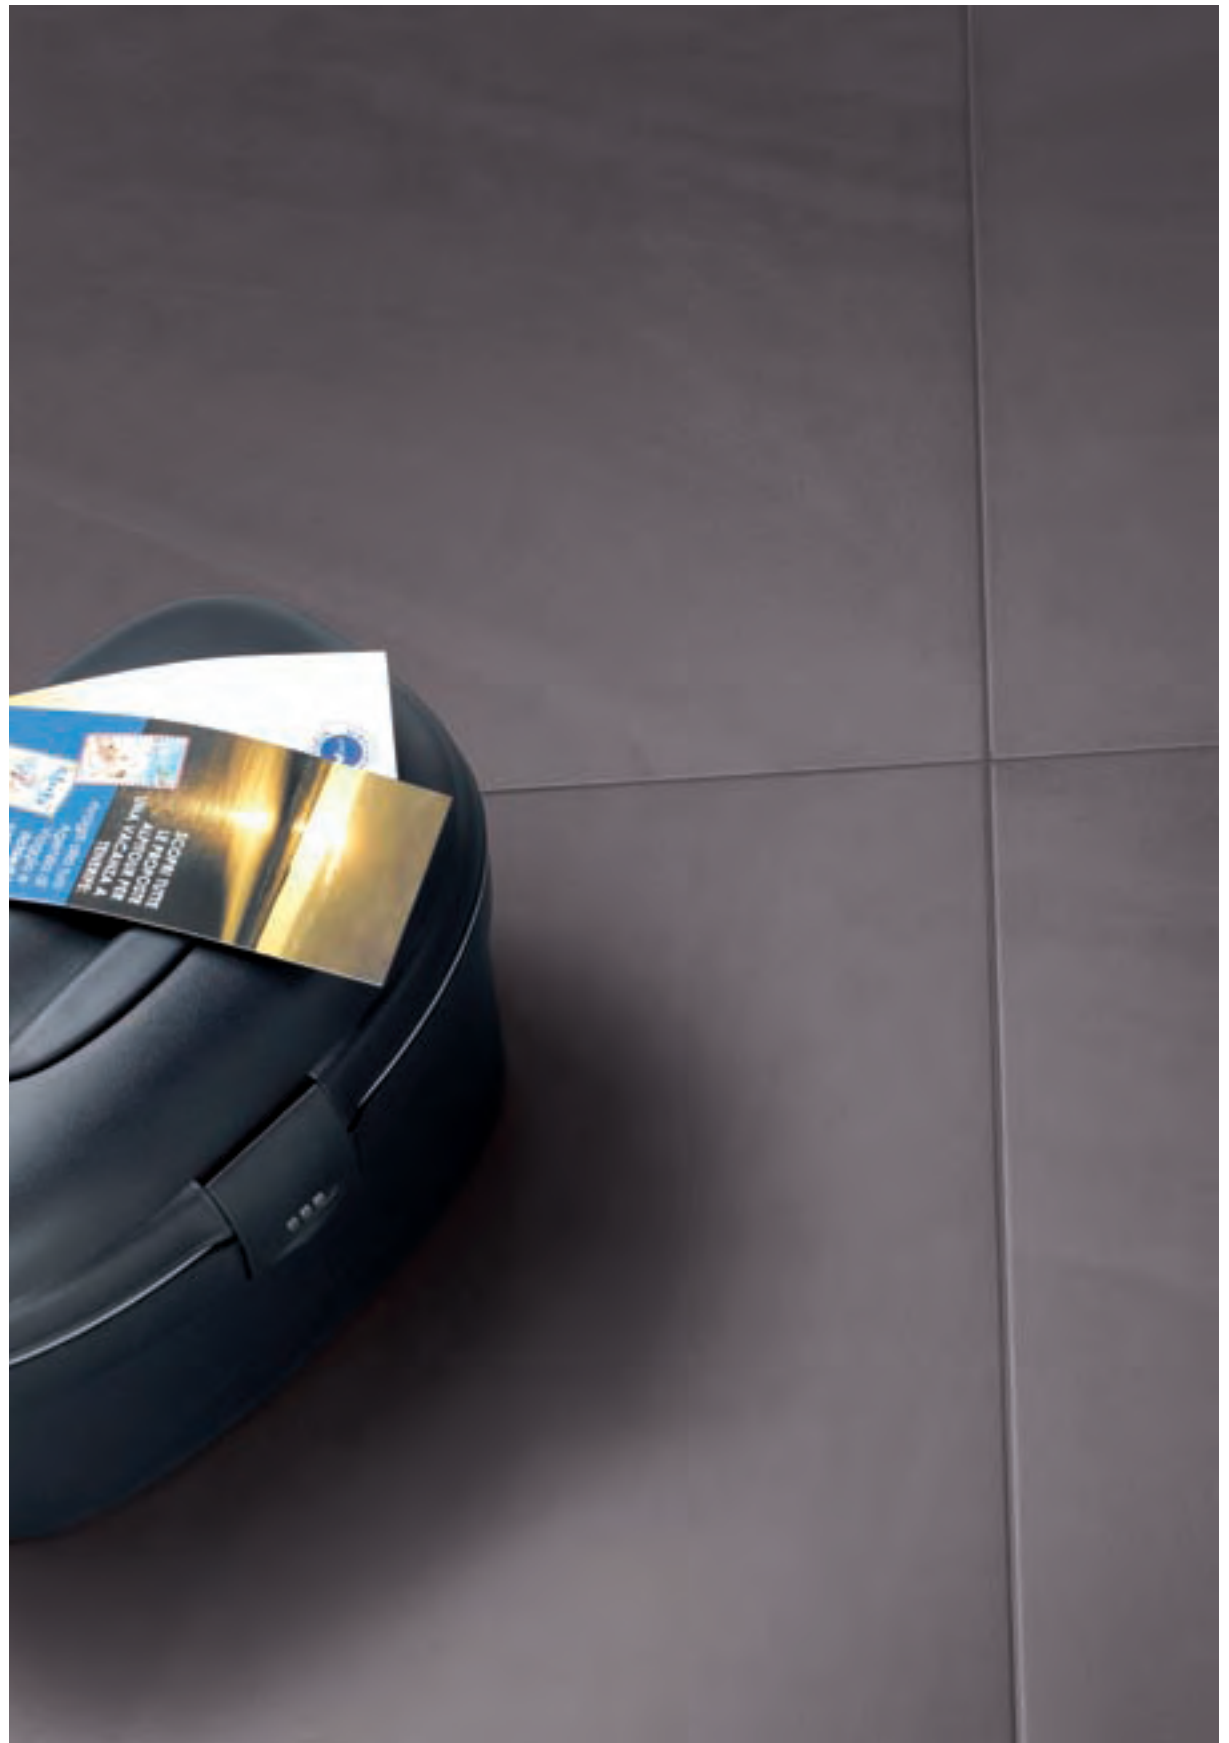

Its groundbreaking technology and ceaseless development of alternative solutions to meet the needs of the contemporary architecture and construction sectors reflect IMPRONTA CERAMICHE's unrivalled responsiveness to market trends.
